We Support Your Aircraft Modifications

We Provide:

Outsourced structural engineering support

Custom design/build project support

Design and/or fabrication of:

Sensor Mounts

Mission Consoles

Instrument Panels

Equipment Racks

Antenna doublers

Sheet metal components

PMA fabrication and kits

For:

ISR/Special Missions aircraft

Weather research aircraft

Firefighting aircraft

Cargo conversions

FAA Part 23, 25 or 27 aircraft

STC's, major alterations and commercial derivative aircraft

Foreign, domestic or ITAR-controlled

Engineering Capabilities

- Over 65 years of combined engineering experience in aircraft modifications
- Overflow engineering support for understaffed teams
- Design and build project support for convenient outsourcing
- Co-located design and build personnel

Prototyping and Mockups

- Three 12"x12"x24" capacity 3D printers for fit-check mockups and rapid prototypes
- Same-day development of 3D-printed tooling for quick-turn projects
- Fit-check, trade show or airworthy mockups and surrogates can be created quickly

Manufacturing Capabilities

- Over 50 years of combined aviation manufacturing experience
- 5,600 square foot manufacturing facility with 5'x10' CNC Router, 35-ton Press Brake, 250-ton Forming Press, and more.
- Mission console and equipment rack assembly and wiring
- Sheet metal and honeycomb panel pin construction
- CNC machined components and assemblies

What Sets Us Apart?

Responsiveness

We focus on working collaboratively to assure on-time, accurate part and data deliveries that meet or exceed expectations. We are proactive, efficient, and respond to requests promptly.

Design/Build Team

Our experienced engineers and technicians are co-located, allowing ad-hoc design reviews, troubleshooting and technical feedback to occur in real time, as often as necessary.

Experience

Our team of engineers and fabrication experts has over a century of combined aviation experience. From simple antenna installations to complex electromechanical components, we've installed many types of equipment on a wide range of aircraft.

Competitive Pricing

We offer competitive hourly or per-project pricing, depending on customer requirements and project definition. We work to provide realistic estimates based on decades of experience.

Support

Our goal is responsive, accurate and on-time parts and support for your aircraft modifications. We don't have a hangar, because we're here to support you, not compete with you.
